# JOSHUA NELSON

## KEY ACHIEVEMENTS

**Efficiency Improvement**
Increased product efficiency by 20% through innovative design and testing methods at Texas Instruments.

**Product Reliability Enhancement**
Enhanced product reliability by 25% through rigorous testing and validation at Lockheed Martin.

**Operational Efficiency Boost**
Contributed to a 15% increase in operational efficiency through effective electrical system design at General Electric.

**Downtime Reduction**
Reduced downtime by 30% by conducting thorough failure analysis and implementing corrective actions at Lockheed Martin.

## SKILLS

Electrical design · Product testing · Manufacturing process management · Schematic production · CAD software · Installation oversight

## Electrical Engineer | Product Development | Testing

Email LinkedIn Fort Worth, TX

## SUMMARY

Electrical Engineer with 10 years of experience in developing and testing electrical devices. Skilled in managing manufacturing processes, producing schematics, and overseeing installations. Notable achievement includes increasing product efficiency by 20%.

## EXPERIENCE

### Senior Electrical Engineer — 01/2018 - Present
**Texas Instruments** — Dallas, TX

- Led a team of 10 engineers in the design and development of high-efficiency electrical devices, resulting in a 20% increase in product efficiency.
- Managed the manufacturing process of new electrical equipment, ensuring compliance with safety and industry standards.
- Implemented advanced testing protocols that reduced product failure rates by 15%.
- Collaborated with cross-functional teams to integrate new technologies into existing products, enhancing overall performance.
- Utilized design software to produce detailed schematics, improving accuracy and reducing design errors by 10%.
- Oversaw the installation process of electrical systems in various facilities, ensuring timely and efficient completion of projects.

### Electrical Engineer — 06/2014 - 12/2017
**Lockheed Martin** — Fort Worth, TX

- Developed and tested electrical components for aerospace applications, enhancing product reliability by 25%.
- Supervised the production of new electrical systems, ensuring all products met stringent safety standards.
- Conducted failure analysis and implemented corrective actions, reducing downtime by 30%.
- Collaborated with design teams to create detailed electrical schematics using CAD software.
- Led the installation of complex electrical systems in aircraft, ensuring adherence to technical specifications and safety protocols.

## EDUCATION

### Bachelor of Science in Electrical Engineering — 01/2006 - 01/2010
**Texas A&M University** — College Station, TX

## CERTIFICATION

**Advanced Electrical Systems Design**
Offered by MIT, this course covers the latest advancements in electrical systems design.

**Safety and Compliance in Electrical Engineering**
Provided by Coursera, this certification focuses on safety protocols and compliance standards in electrical engineering.
